Bachelor of Technology
Dharmsinh Desai University

07/2018 - 05/2022   *Nadiad*
Information Technology
- CPI :- 7.64

WORK EXPERIENCE

Software Engineer (React Js)
Bacancy Software LLP

07/2022 - Present   *Ahmedabad, Gujarat, India*
Achievements/Tasks
- Implemented complex functionalities for an E-advertising web app enabling shops and brands to conduct advertisement and promotions through influencers.
- Executed crucial features such as switch out, copy, cancel, and restore campaigns with a focus on accurate data correction, particularly vital for YouTube video counts.
- Took on the responsibility of creating and managing dynamic companies within the platform, overseeing various components like roles, people, services, reporting, and notification modules in the administrative section.
- Developed and fine-tuned the functionality for managing video production orders, introducing flexibility by granting access to temporary accounts for a smoother workflow.
- Conducted thorough data analysis on large datasets, using Plotly and Highchart for interactive visualizations in MEAN stack-based web app for data analysis and chart representation..
- Collaborated with cross-functional teams to ensure data accuracy and formulated data-driven recommendations for informed business decisions.

Software Engineer Intern (React Js)
Bacancy Software LLP

01/2022 - 06/2022   *Ahmedabad, Gujarat, India*
Achievements/Tasks
- Learned various fronend technologies, libraries and framworks (Redux, NextJS, React DND, Chart.JS, React-Select, D3.JS etc.)
- Built projects using various UI libraries and backend technologies.
- Built responsive dashboard for client from scratch to manage and monitor users, communities, payment info, revenue and event created by users.
- Worked on E-advertising web app where shops/brand can do advertisement/promotion through influencers. (Reactjs, Bootstrap, Nodejs & MySQL).

SKILLS

`JavaScript` `React Js` `Next Js` `TypeScript`
`Redux` `HTML` `CSS` `Node Js` `Express Js`
`Firebase` `MySQL` `Mongo DB` `Git`
`REST API` `GraphQL`

PERSONAL PROJECTS

E - Commerce
- E Commerce platform using the MERN stack for a small business.
- Implemented a MongoDB database to store product information, user data, and order details.
- Utilized React.js for front-end development and implemented responsive design.
- Overcame the challenge of implementing responsive design by testing the application on various devices.

Smart Health Card
- Developed a secure system for storing and retrieving health information using MongoDB and encrypted data transfer using Node.js and Express.js.
- Created a user-friendly interface for managing and accessing health information using React and integrated QR code scanning for information sharing with healthcare providers.
- Implemented various security measures such as encryption and user authentication to ensure the confidentiality and privacy of health information.
